Bengal research: next steps and governments at the time

A source-checking packet | 27 October 2026 (New York date)

Research question
Did this particular police account occur previously in ordinary criminal cases in Bengal, and how closely do earlier cases resemble the recent ones?

1. Finish Bengal's historical body review

There are **255 usable Bengal-related candidate articles still awaiting full-body reading**. These are location/desk-screened reports, not 255 verified Bengal incidents. Read the bodies and separate ordinary crime, custody/reconstruction, border operations, crowds and insurgency.

2. Build the closest-comparison table

For each relevant episode, record custody status, alleged firearm-taking, individual/group attribution, reconstruction, who was shot, outcome and incident date. Deduplicate repeated reports. Keep broader similarities and unresolved sources explicit.

3. Independently check the strongest matches

Open the linked originals and check the coding yourself. Additional AI agreement is not human validation. Record corrections using the case ID, source URL and the passage that changes your assessment.

4. Reassess Bengal before and after May 2026

Apply the same retrieval and coding to comparator states before estimating differences. Sparse or flat pre-period outcomes and changing coverage can leave synthetic comparisons poorly determined. The selected examples below are not an event-rate denominator.

How to read and validate this packet

On the following pages, **case labels link to TOI reports** and **chief ministers link to government evidence**. Verify incident date separately from publication/update date; check who allegedly took whose gun, who fired, and whether reconstruction is stated. Government at the time is context, not proof of political instructions.

Punjab 2015: the allegation concerns a private attack involving a constable on leave, not an established official police operation. Maharashtra 2020 uses contemporary undivided Shiv Sena/NCP names. Source confidence and coalition qualifications are retained in the government ledger; no exhaustive cabinet history is asserted.

Government tenure is primarily checked against official records; some party/coalition details use contemporaneous reporting or a mirrored government handbook. Open the complete CSV and source audits.
